Mumbai, India — amxxn10@gmail.com — +91 7045512632 — [LinkedIn](#) — [GitHub](#)

Summary

AI Engineer with hands-on experience in building LLM powered applications, RAG Pipelines, and ML model deployment. Currently specializing in Agentic AI and Multi-Agent Systems, with a solid background in backend engineering and RESTful APIs design. Committed to building efficient, scalable, and intelligent systems through rigorous experimentation and software engineering best practices.

Skills

Languages:	Python, JavaScript, Java
AI/LLMs:	LLM Integration, RAG Pipelines, LangChain, Vector DBs(Chroma), Embeddings
Machine Learning:	Scikit-learn, NumPy, Pandas, Random Forests, Regression, Evaluation
Backend & DB:	FastAPI, RESTful APIs, JWT, MongoDB, Supabase, PostgreSQL
Cloud & Dev:	AWS, Docker
Version Control & Tools	Github, Cursor, Claude Code, Jupyter Notebook

Projects

STRAT IQ - AI Powered Decision Intelligence Platform (In Progress) *Jan 2026 - Present*

[Github Repo](#) 

Python, Next.js, Fast API, RAG, LLM APIs, Vector DB, Embeddings, Supabase, AWS, Docker

- o **Architected** a SaaS platform for startups, integrating predictive **Random Forests and Regression** Revenue forecasting and Churn Prediction with **Gemini 3 Flash** analysis & RAG-driven domain specific queries.
- o **Built** a modular **RAG** Chatbot system using **LangChain** and **ChromaDB**, enabling natural language querying over startup-specific datasets via **Meta Llama 3.1**.
- o **Optimized** RAG pipeline latency by 80%(reducing response time from 7s to 2s) by implementing **Asynchronous processing and Server-Sent Events (SSE)** for real-time streaming.
- o **Engineered** a high-performance **FastAPI** backend with **PostgreSQL** and **Supabase**, ensuring multi-tenant data isolation through **JWT/OAuth** and robust **RESTful** API design.
- o **Currently leveraging Docker** for containerizing microservices architecture for scalable **AWS** deployment.

SENTRY – AI-Powered Mental Health Companion [Github Repo](#)  *May 2025 – Aug 2025*

React, Express.js, MongoDB, FastAPI, Hugging Face, Gemini API

- o Developed a secure, **AI-driven journaling platform** with end-to-end encryption to ensure user data privacy.
- o Architected a Backend(**Node.js, FastAPI, MongoDB**) with **JWT** for secure, scalable, multi-tenant data management.
- o Engineered a multi-stage NLP pipeline using **LLM APIs** for Journal Analysis and **Hugging Face** for real-time emotion classification and mood forecasting with 92% accuracy, to generate personalized wellness insights and psychological recommendations from unstructured text entries.

Education

Bachelor of Science – Information Technology *2025 – 2027*

University of Mumbai

Relevant Coursework - Python, Data Structures, Computer Networks, Operating Systems, Software Engineering

Diploma in Computer Engineering *2021 – 2024*

Muchhala Polytechnic

Relevant Coursework - OOP, Java, DBMS

Extra-Curricular & Leadership

- o **Head Organizer, NOVA TECH:** Orchestrated an inter-college technical event for college, featuring DSA challenges and gaming events for 200+ participants.
